REPLACE 211 NON-CONTACTLESS CARDS MORE THAN A YEAR FROM EXPIRATION FOR $1,688

Prioritize the cards that would otherwise wait the longest for scheduled replacement

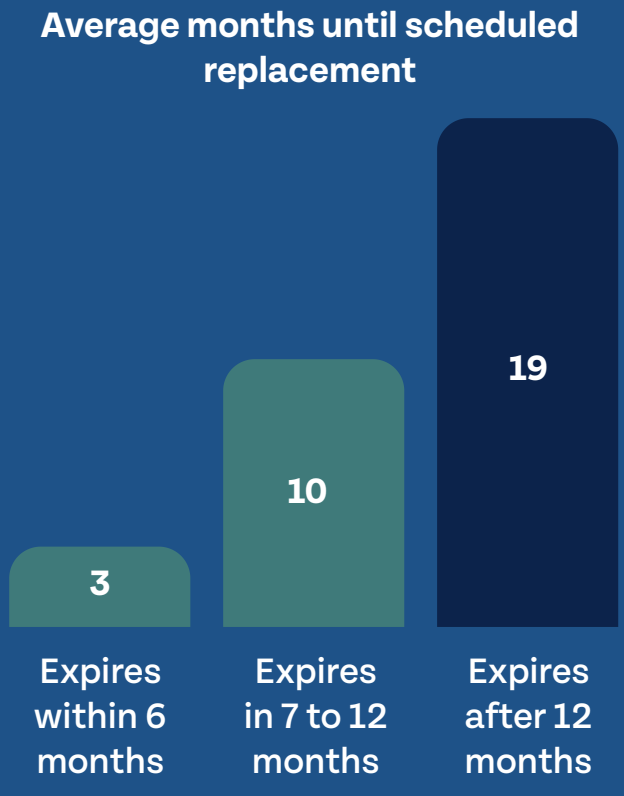

1 The Decision

Bear Down Bank can approve one early-replacement batch this quarter. The goal is to improve contactless access without spending early-replacement funds on cards that will expire soon anyway.

2 Why This Batch ?

19 MONTHS

The longer the wait, the stronger the case for early replacement

3 Recommended Action

211 CARDS

Replace the non-contactless cards that are more than 12 months from expiration.

$1,688

Estimated early-replacement cost at $8 per card.

4 Why it Matters

These cards face the longest wait for scheduled replacement. Replacing them now improves contactless access while avoiding unnecessary early replacement of cards already close to expiration.
